

CORE COMPETENCIES

Full-Stack Development, Version Control, Microservices, Continuous Integration and Continuous Delivery (CI/CD), Cloud Services, Containerization and Agile Development

PROFESSIONAL EXPERIENCE		
Lead Software Developer - Full-Time	Steptask Oy	MAY 2025 - PRESENT
Architected and delivered the core technical infrastructure for a three-sided EU service marketplace using React, TypeScript, and Supabase. Engineered critical product surfaces across user and admin interfaces, integrating real-time messaging, milestone tracking, and multi-provider payment workflows (Mollie/Stripe). Maintained database integrity and serverless architecture, executing 140+ database migrations and implementing Supabase Row Level Security (RLS) alongside custom Edge Functions. Established strict CI/CD pipelines and platform security standards to guarantee system availability, high performance, and continuous deployment reliability.		
Software Developer - Part-Time	Hobiver.com	MAR 2025 - SEP 2025
Developed full-stack web applications and systematically modernized legacy codebases utilizing React, TypeScript, and Node.js. Designed scalable RESTful APIs and integrated third-party integrations for user authentication, payment processing, and multi-tiered data flows. Optimized application performance through proactive frontend and backend profiling, reducing load times and improving platform responsiveness.		

EDUCATION		
Haaga-Helia University of Applied Sciences	Helsinki, Finland	JAN 2025 - PRESENT
Bachelor in Business Information Technology (Majoring in ICT Infrastructure and Cloud Services): C, C++, Java, Python, Databases, Cloud Services, OS Systems (Windows, Linux), and advanced web applications		
Helsinki Business College	Helsinki, Finland	AUG 2024 - JAN 2026
Diploma in Full-Stack Web Development Program (Graduated): HTML, CSS, JavaScript, TypeScript, React Native, Debugging, Containerization (Docker), and CI/CD		

- TECHNICAL SKILLS
- LANGUAGES:** HTML & CSS, JavaScript, TypeScript, SQL, Python, C/C++
 - FRAMEWORKS:** React, Node.js, Express.js
 - DevOps and Cloud:** Docker, CI/CD, Git/GitHub, AWS
 - Tools and Methods:** Postman, Agile (Trello)
 - Systems:** Windows, Linux, MacOS
