PROFESSIONAL SUMMARY

Software Developer with practical experience building scalable web applications using React, TypeScript, and Node.js. Combines a solid academic foundation in Business IT with hands-on background in full-stack development, including designing payment flows and integrating third-party APIs. Focused on writing maintainable code, optimizing performance, and delivering practical solutions for users.

WORK EXPERIENCE

StepTask

Software Developer Lead

MAY 2025 - PRESENT

- Lead architecture and delivery of StepTask, a three-sided EU service marketplace (React/TypeScript + Supabase)
- Own product surfaces for customers, providers, and admins: tasks, matching, messaging, milestones, payments, and disputes
- Build and maintain payment and webhook integrations (Mollie/Stripe), realtime chat/progress updates, and a full admin ops console
- Manage CI/CD, RLS/security hardening, and performance/testing practices across 140+ DB migrations and Edge Functions

Hobiver

Software Developer (Part-Time)

MAR 2025 - SEP 2025

- Built and maintained full-stack web applications with React, TypeScript, and Node.js, delivering new features and fixing production issues across the product lifecycle
- Migrated legacy modules to modern frameworks and libraries, improving maintainability and aligning the stack with current best practices
- Improved application performance and scalability through profiling, query optimization, and frontend/backend efficiency work
- Designed and implemented RESTful APIs and integrated third-party services for authentication, payments, and external data flows
